

# Marcelo Carabajal

## BACKEND / FULL STACK DEVELOPER

Full Stack Developer with a backend-oriented profile and experience building web applications and enterprise solutions. I work with technologies such as Java (Quarkus, Spring Boot), Node.js, TypeScript, NestJS, Next.js, React, and C#/.NET, contributing to the design and evolution of APIs, integrations, business logic, and scalable applications.

## TECHNICAL SKILLS

### Languages

- Java, JavaScript, TypeScript, SQL, C#, C++

### Backend

- Quarkus, Spring Boot, Node.js, Express.js, NestJS, ASP.NET Framework

### Frontend

- React.js, Next.js, HTML, CSS, Mobile, React Native, Android Studio (Java)

### Databases

- SQL Server, MongoDB, Firebase

### DevOps / Tools

- Docker, OpenShift, Git, YAML, Swagger

### Testing

- Jest, JUnit, Mockito

## WORK EXPERIENCE

### Grupo Hasar - Hasar Systems

Software Developer

2021 - Present

- Develop web and backend applications using Java (Quarkus, Spring Boot), Node.js, TypeScript, NestJS, Next.js, and React.
- Contribute to enterprise projects focused on business logic, APIs, integrations, and system evolution.
- Collaborate on deployment configuration through environment variables, YAML files, and application preparation for pipelines in OpenShift-based environments.
- Use Docker to support deployments, technical testing, and integration across environments.
- Participate in implementation processes, technical validation, testing, and solution optimization.

### Coderhouse

React.js Tutor

2022 - 2023

- Guided students in learning React.js, components, hooks, and state management.
- Designed practical exercises and supported technical problem-solving.
- Provided feedback on code quality, best practices, and frontend project structure.
- Helped improve students' technical understanding through applied examples.

### Brillante Pro - QUELOCO Creativo

Freelance Developer

2020 - 2021

- Designed and developed interactive web solutions focused on improving user experience.
- Built responsive interfaces with attention to performance, usability, and mobile adaptation.
- Improved websites and digital products to optimize loading times and accessibility.
- Worked with modern frontend technologies to deliver functional solutions tailored to client needs.

## EDUCATION

• University Technical Degree in Programming  
UTN General Pacheco – Buenos Aires, Argentina

In Progress - Last year

• Full Stack Developer Program  
Coderhouse - Buenos Aires, Argentina

2022 - 2023

• University Automotive Technician  
UTN General Pacheco – Argentina

2015 - 2019

## LANGUAGES
